Maryland Agricultural College.

General Observations.

THIS Institution comprises two departments, the Collegiate and Preparatory; constituting one household of which the President and a portion of the faculty are resident members. The object of the Institution is not so much to make practical farmers of the students of the College, as to make the rising generation of farmers thoroughly educated men, with special reference to Agricultural pursuits. With this view the course of study has been made complete—including the ancient and modern languages. Special attention is given to all those sciences that bear in any way upon the profession of the farmer, such as Chemistry, Surveying, (especially chain surveying,) Entomology and Botany. In Entomology and Pomology, this Institution enjoys peculiar advantages. The Museum contains the celebrated modeled fruits of Mr. Glover, the United States Entomologist, as also his very full and valuable collection of Insects. It will also be seen, by a reference to the course of study, that those studies that tend to adorn as well as to discipline the mind, receive their due attention.

Agriculture.

Instruction in Agriculture is the peculiar feature of the College. This is both theoretical and practical. Labor or work on the farm is not allowed to interfere with studies, but, like the Military Drill in other Institutions, it is superadded to the mental training, which is the primary object of the College. The out-door exercise, that is systematically required of each student, is very happy in its results, whether the pupil anticipates being a farmer or not, in the health and physical vigor he thereby attains.

The design in the Horticultural department is to teach practically all the nicer and finer operations of gardening, which do not generally receive much attention on the farms, and also to cultivate the taste for flowers and ornamental gardening.

A Gymnasium is also attached to the College.

Discipline.

The discipline of the College is parental in its character. The President residing in the building with the students, exercises supervision of their manners and morals.

A daily record is kept of attendance, recitation and conduct. From these daily records a monthly report is sent to the parents and guardians.

All delinquencies, whether in lessons or behavior, are entered in a book kept for that purpose. The record against each student may be examined by him or his parents at any time on application to the President. When an exhibit of this record is sent to any parent or guardian, without a request, it may be regarded as the first step towards separating the pupil from the College.

Divine Worship.

The students are all required to attend divine worship every Sunday, in the College Chapel, which is on such occasions open for public use; also family prayers morning and evening.

Buildings.

The buildings have been erected for the pupposes of a School and College, and every attention has been paid to their ventilation, and to the comfort of the pupils. The students of the College occupy private rooms. Those in the preparatory department study in a school-room under supervision of one of the Professors.

The College is situated on the Washington Turnpike, about three miles north of Bladensburg. It is about three quarters of a mile from College Station on the Washington Rail Road. The Post-office address is Maryland Agricultural College, Prince George's County.

Examinations and Commencement.

There are two public examinations in the Academic Year, one at the end of the first term, in the last week in January, and the final examination in the last week in June. It is required that every Student be present.

The public commencement takes place after the final examination.

Terms and Vacations.

The Academic Year is divided into two terms of five months each, viz: from the first Monday in September to the first day of February, and from the first day of February, until the last week in June.

There will be a recess during the Christmas holidays of one week, and of one week at Easter. There are no other holidays.

Expenses.

The charge for the Scholastic Year is $250. This includes all the expense except for books, stationery and medical attendance. A deposite of $10 for each term is required to cover incidental expenses, spending money, &c.
